EDUCATION

University of Virginia, School of Engineering and Applied Science

Charlottesville, VA

B.S. Electrical Engineering (3.83/4.0)

Expected Graduation: May 2028

Relevant Coursework: Applied Probability, Statistics, Electromagnetic Fields, Applied Circuits, Ordinary Differential Equations

WORK EXPERIENCE

Abernethy & Spencer, Operations Intern, Purcellville VA

Summer 2026

- Implemented AI protocols to assess inventory in a recent acquisition over 17,000 unique SKUs
- Maintained programmable irrigation systems watering 20+ sections of trees and shrubs
- Became familiar with a multifaceted business, working with retail customers and contractors

Hepburn & Sons LLC., Engineering Intern, Manassas, VA

Summer 2024

- Conducted research on U.S. Navy SBIR \$1m+ solicitations and emerging energy technologies
- Gained familiarity with the contract award and funding processes
- Analyzed current DoD modernization initiatives, such as shipboard DC power distribution

Chick-Fil-A, Personnel Trainer, Chantilly, VA

June 2023 – August 2025

- Trained and onboarded 10+ new employees, and monitored general performance
- Regularly conducted performance evaluations and related results to management

Desktop Computer Building, Freelance

Summer 2023

- Assisted 15+ clients with the assembly and setup of Windows gaming desktops
- Created parts lists in keeping with budgets from \$500 - \$1000
- Demonstrated and explained technical concepts to middle school students

PROJECTS

Futures Markets Analysis, Independent

Summer 2026 (In Progress)

- Worked with Kalshi and Google Insights APIs to analyze data
- Analyzed correlations between social media trends and election market reactions
- Created Python scripts to simulate various trading strategies on BTC and ETH forecasting markets

Variable Boost Converter, Applied Circuits

Spring 2026

- Collaborated with a team to analytically verify, manufacture, and test a 5V – 12V DC boost converter
- Performed calculations and KiCad simulations to verify component values
- Created PCB layouts for manufacturing and soldered components to the completed board

Medieval Trebuchet, Lead CAD Designer

Spring 2025

- Led the CAD design of a mock trebuchet to bear a 405 lb. counterweight and deliver projectiles
- Created materials lists and cost estimates at various stages of the project
- Took part in the testing and assembly of the trebuchet

OTHER EXPERIENCES

Theme Park Engineering Club, Executive Competitions Chair

Fall 2025 - Ongoing

- Growing club membership from ~5 regular attendees to over 20
- Working with a \$2000+ budget to create a model amusement ride for an intercollegiate competition
- Creating sub-teams and communication protocols to streamline deliverables
- Developed an internal consulting competition for student members, creating documents and criteria

Deloitte Engineering Consulting Competition

Spring 2026

- Collaborated with a team to develop formal recommendations for the National Parks Service
- Created data visualizations, maps, and information-dense PowerPoint slides.

Virginia Undergraduate Law Review, Editor

Fall 2025

- Worked with managing editors and writers to produce professional legal analysis for a periodical publication
- Provided analytical feedback and review of argumentative and explanatory pieces

SKILLS

Software: VSCode, KiCad Circuit Design, Fusion360

Programming: Python, Java, C, x86-64 Assembly, Arduino IDE, Git Repo, Claude Code

Technical: Circuit Testing and Analysis, Quantitative Analysis, Documentation, Troubleshooting, Monte Carlo Simulation

Hardware: Arduino Uno, ESP32, AnalogDiscovery2, 3D Printing, Desktop Building, Wiring
